

Greengauge Surfaces

WORLD CLASS OVERSEAS EXPANSION

Greengauge is a truly World Class product installed in over 25 bowling countries around the world. Other brand names for the product include BowlsWeave and Green-Weave both as the name suggests a woven surface. Greengauge Punch 650 is our robust needle punched bowling surface product. We here at Greengauge can advise on base construction and best surface options whether it is indoor or outdoor and can assist local contractors and bowling clubs with a full consultancy package if one is needed.

This includes having available Greengauge personnel with over 60 years experience in the sport. Recent landmarks for Greengauge have included the completion of the first indoor bowling facilities in Malaysia, India and South Africa. With us fast approaching nearly 200 installations in Australasia alone, our market leading position is secured. A Greengauge supplied UV stabilised bowling surface and underlay, combined with our Greengauge specified base will provide clubs with a World Class Bowling Green.

THE CHOICE OF CHAMPIONS

Greengauge Surfaces & Henselite

A WORLD CLASS PARTNERSHIP

www.greengauge.com

A WORLD CLASS INDOOR BOWLING SURFACE

The Greengauge indoor woven surface has been available for around 40 years and is supplied through Crystals Limited in which world leading bowls manufacturer Henselite Australia have a controlling interest. A tried and tested surface that is by far the most played on artificial surface in the World. Despite the introduction of copy products Greengauge easily retains 'The World's No.1 selling Indoor Surface tag'... In fact the first indoor bowling surfaces in India, Malaysia and South Africa were recently installed by Greengauge. Manufactured from 100% polypropylene it is incredibly durable, and provides superb bowling characteristics that bowlers enjoy.

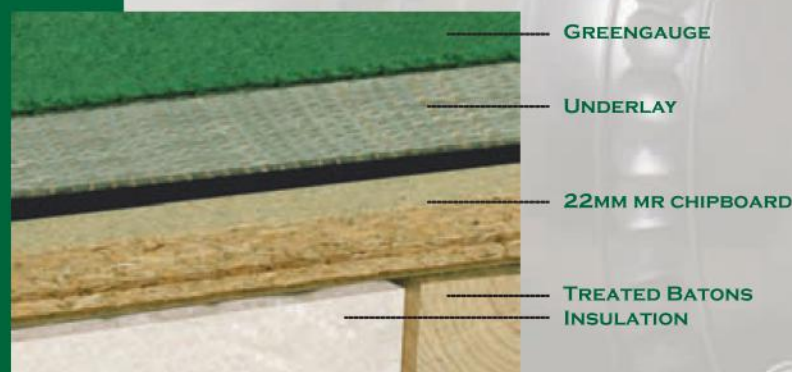

A WORLD CLASS UNDERLAY

Duralay underlay has been manufactured in the UK since 1954. Duralay is better engineered, better designed and manufactured to tighter tolerances than other products, complying to and often exceeding BS5808:1991. Duralay underlays are manufactured to withstand the rigours of indoor bowling and choosing one is critical to the future performance and speed of the bowling green. **Formula One** is currently our top of the range product and generally delivers speeds between 17 and 18 seconds that most Indoor Clubs appreciate. For Bowling Clubs looking for slower speeds this can be accommodated with Gold Medal. Without doubt combining a Greengauge surface with a Duralay underlay provides the perfect combination for Performance, Speed and Durability.

Katherine Rednall,
Former World Ladies Matchplay Singles Champion
"Greengauge surfaces are simply the best."

A WORLD CLASS TIMBER FLOOR SYSTEM

Built to tolerances of $\pm 0.5\text{mm}$ over 3m, a Greengauge timber floor uses only the very best materials. Installation is very quick, typically only 2 weeks for a 6 rink green. In recent years Greengauge has been awarded some of the most prestigious contracts not only in the UK but all over the world. By choosing a quality Greengauge timber floor this will only increase the playing performance of the Greengauge surface and Duralay SuperGold underlay. For bowling clubs considering improving their existing floor, give us a call for the best advice on the options available.

INDOOR MAINTENANCE PROGRAMME

Indoor Greengauge surfaces are installed by our own teams of experienced and dedicated fitters. Every installation is given a full commitment until all work is completed to our customers satisfaction. Greengauge also offers a range of maintenance contracts to suit all needs and budgets. Our full after sales service offers you peace of mind, 7 days a week, 52 weeks a year. The Greengauge bowling surface is one of the most important parts of any bowling club and Greengauge is there to ensure it is operational at all times.

"I have played on many surfaces in recent years but the best by far is Greengauge, a truly world class bowling surface"

- Nick Brett, Current WBT World Number One.

A WORLD CLASS OUTDOOR BOWLING SURFACE

Have you ever considered an outdoor artificial bowling green? If you have, Greengauge offer the complete turn-key solution. The existing Greengauge fitting team have over 60 years of experience in ensuring the best possible outcome. From start to finish Greengauge can project manage all facets of the contract including any civil engineering works. The end result being a fully installed bowling green surface that the members can enjoy all year round. Whether it be a Flat or Crown green your club is considering, please don't hesitate to contact us for the best advice.

A WORLD CLASS BASE

- Preparation of site
- Installation of drainage
- Engineered base designed for local conditions
- Surface designed to World Bowls approved tolerances

The Greengauge outdoor surface is available in two main qualities - woven and needle punched. Both are made of 100% polypropylene. A third option, sand filled is available if specified by the club. All qualities are UV stabilised and with the correct maintenance will provide many years of pleasurable bowling and will give the club an unbeatable surface in terms of Performance, Speed and Durability. Greengauge outdoor surfaces are cost effective - no more greenkeeper fees, chemicals and expensive green dressings.

OTHER ADVANTAGES INCLUDE:

- Fast drainage
- Fully guaranteed
- Very low maintenance
- True playing characteristics

OUTDOOR MAINTENANCE PROGRAMME

Outdoor Greengauge surfaces are installed by our own teams of experienced and dedicated fitters. Every installation is given a full commitment until all work is completed to our customers satisfaction. Greengauge also offers a range of maintenance contracts to suit all needs and budgets. Our full after sales service offers you peace of mind, 7 days a week, 52 weeks a year. The Greengauge bowling surface is the most important part of any club and Greengauge is there to ensure it is operational at all times.

"When you walk onto a Greengauge surface you know the match result is down to your own ability and performance"

Greg Harlow, World Indoor Singles Champion.
